

# MILAD GERAMI

Senior BI Developer | Data & Analytics Solutions Architect

Irvine, CA | [m.gerami.data@gmail.com](mailto:m.gerami.data@gmail.com) | [linkedin.com/in/milad-gerami-67960953](https://www.linkedin.com/in/milad-gerami-67960953)

Engineers robust data pipelines and analytical models, translating business needs into high-impact, production-ready insights.

Open to relocation to the Pacific Northwest

## PROFESSIONAL SUMMARY

I deliver data solutions that executives actually trust to make decisions. Specializes in Power BI, SQL, and SSIS, building scalable dashboards, optimized data models, and end-to-end ETL pipelines that turn complex data into clear, actionable insights. Known for eliminating inefficiencies, automating reporting, and improving performance, while increasing visibility across teams and leadership.

I combine strong engineering and analytical expertise to translate business requirements into high-impact solutions that drive strategy not just reports. Consistently delivers clean, reliable data and insights that move the business forward.

## PROJECT(S) + PORTFOLIOS

Portfolio: [milad-gerami.github.io](https://github.com/milad-gerami)

## CORE COMPETENCIES & TECHNICAL EXPERTISE

- **Business Intelligence & Visualization:** Power BI (Desktop, Service), DAX, executive-level dashboard design, KPI development, data storytelling
- **Data Engineering & Databases:** SQL Server, T-SQL (CTEs, Stored Procedures, Views), query optimization, data validation, performance tuning
- **ETL & Data Modeling:** SSIS, end-to-end ETL pipeline development, data warehousing, star schema design, Power Query
- **Programming & Analytics:** PostgreSQL, REST APIs, and VS Code, with hands-on experience building data workflows from the database layer through the API into reporting
- **Business & Leadership Skills:** Stakeholder management, translating business requirements into technical solutions, problem-solving, process optimization, communication, and delivering insights that influence decision-making

## EXPERIENCE

**Power BI Developer**  
**Colaberry Inc - Remote**

**Jan 2024 – Present**

- Designed Power BI Dashboard analyzing 50K+ vehicle records across multiple powertrains to uncover market shift trends by efficiency, cost, and market share, built on an SSIS pipeline and SQL Server data model
- Built Power BI dashboards analyzing 1,000+ projects across 83 risk variables, achieving 96.5% prediction accuracy and enabling proactive decision-making
- Designed star-schema models and optimized DAX measures to support KPI tracking and cost overrun analysis
- Translated stakeholder requirements into BI dashboards and reports used for performance tracking and operational decision-making
- Engineered SSIS ETL pipelines that unified fragmented data sources into a single source of truth, ensuring leadership had consistent, decision-ready data at all times
- Refined and optimized SQL queries and data models to eliminate performance bottlenecks, delivering faster, more reliable reporting that stakeholders could depend on without question

**Data Analyst (Intern)**  
**Colaberry Inc - Remote**

**July 2023 – Dec 2023**

- Built LaunchForge AI, a production SaaS platform using PostgreSQL, REST APIs, and VS Code, gaining hands-on experience in how data moves from the database layer through the API into reporting and analytics
- Strengthened data accuracy and reliability by applying data warehousing best practices, validation techniques, and structured modeling approaches across reporting solutions
- Built SSIS ETL pipelines to transform and standardize complex data, delivering reliable, business-ready datasets that supported accurate reporting and decision-making

- Developed SQL queries and data models that powered analytics and reporting, giving stakeholders direct access to clear, actionable insights without reliance on manual processes
- Delivered Power BI dashboards and applied data warehousing principles to improve data visibility, enabling teams to better track performance and make informed decisions

**Telecommunications Specialist | All States Engineering & Surveying |**

**April 2020 – Jan 2023**

- Led cross-functional telecom projects and introduced structured reporting workflows that improved data visibility and enabled more informed operational decision-making
- Coordinated design and survey operations, ensuring accurate project documentation that supported efficient execution and on-time delivery
- Streamlined communication between field teams and stakeholders, ensuring alignment, reducing delays, and keeping projects moving without bottlenecks

**Project Design (Consultant)**

**2012 – 2019 | Outside US**

- Managed large-scale construction and infrastructure projects, including 5M+ sq ft commercial developments and multi-structure bridge programs, ensuring successful delivery aligned with business objectives
- Directed planning, quality control, and execution across engineering workflows, improving operational efficiency and ensuring consistent, high-quality project outcomes

**EDUCATION + CERTIFICATION**

- B.Sc. Civil Engineering — Tehran Azad University (IAU)
- Data Analytics & Power BI Certified
